EDUCATION

SCTR's Pune Institute of Computer Technology (PICT)

B.E. Electronics and Computer Engineering | CGPA: 9.01/10 (6th Sem)

Expected June 2027

Pune, India

Ram Raj Global Junior College | HSC | 76.33%

May 2023

PROJECTS

TrueThread | React.js, Node.js, FastAPI, PostgreSQL, Redis, LangGraph, Agentic AI, Groq/Llama, Docker

- **Architected Dockerized, microservices REST backend** with **two BullMQ job queues** on **Redis**, orchestrating **data-processing** workflows across Node.js/Express and Python/FastAPI with **Pydantic** validation.
- **Developed a fault-tolerant, 4-node LangGraph AI agent pipeline** using **parallel fan-out/fan-in** and Playwright-driven integration automation to ingest Reddit, YouTube & Wikipedia data, with real-time **SSE** streaming.
- Engineered a **7-node LangGraph** query pipeline integrating **RAG** retrieval, **LLM** claim extraction, conditional routing, and credibility scoring over **PostgreSQL + pgvector**, validated via automated evaluation (**0.88 faithfulness**).

Insight News | React.js, Node.js, FastAPI, Python, MongoDB, LLM, HuggingFace, AWS EC2

- **Developed a 4-stage data-processing pipeline** (Ingest → Scrape → Summarize → Bias) via Node.js/Express, **automated with CI/CD (GitHub Actions)**, aggregating articles from RSS feeds into a MongoDB store.
- **Computed a weighted bias score** (70% LLM + 20% lexical + 10% viewpoint) per article using ML models, integrated the **Google Fact Check REST API** for automated fact-checking, improving reader trust.
- Architected a **microservices-based** system with **REST backend deployed on AWS EC2**, ML inference on **Hugging Face Spaces** — deployed app has processed **1,300+ articles** to date.

GradeX | Node.js, Express.js, MongoDB, SQL, REST APIs, Data Warehousing

- **Collaborated with a 2-member engineering team** to design and build a full-stack, academic management system, separating OLTP/OLAP workloads with a **Star Schema data warehouse** for **analytics**.
- Built a data-mining-driven **At-Risk Identification analytics** feature using MongoDB **aggregation pipelines**, enabling faculty to flag struggling students early from performance and attendance trends.
- Designed **RESTful APIs** and an **MVC design-pattern backend** with role-based auth and **stream-based bulk CSV processing**, enforcing data integrity and validation, with optimized query performance and scalability.

EXPERIENCE

Freelance Web Developer | React.js, Tailwind CSS, Responsive UI

- Designing, developing and **deploying a production-ready React + Tailwind CSS** website for a coaching institute client end-to-end — **translating business requirements** into responsive layouts, including domain setup.
- **Independently owned the full client engagement lifecycle** — **requirements gathering**, pricing strategy, proposal documentation, and **client communication** — for local B2B stakeholders with minimal supervision.

SKILLS

Languages & Core CS : C++, Python, JavaScript, SQL, Object-Oriented Programming (OOP), Design Patterns (MVC), Data Structures & Algorithms, Operating Systems, Computer Networks (TCP/IP), SDLC, Agile

Backend & Databases : REST APIs, API Development, Backend Services, Node.js, FastAPI, PostgreSQL, MongoDB (NoSQL), Redis, Vector DB, Data Pipelines, Data Warehousing, Data Validation, Data Modeling

Tools & Platform : Docker, CI/CD & Automation (GitHub Actions), Cloud (AWS), Git/GitHub

AI Engineering : Generative AI, Large Language Models (LLMs), LLM Integration, Retrieval-Augmented Generation (RAG), AI Agents, LangGraph, Hugging Face, NLP, Machine Learning

ACHIEVEMENTS

- **Top 10** among 350+ teams at SciTech Innovation Hackathon 2025 (national-level)
- Achieved a **2 star rating on CodeChef**, Solved 350+ DSA problems over Leetcode and CodeChef.
- **Department Captain**, Table Tennis — led team selection for inter-department tournaments.
